Dream Analysis, Volume I William McGuire 2021-05-11 While the basis of these seminars is a series of 30 dreams of a male patient of Jung's, the commentary ranges associatively over a broad expanse of Jung's learning and experience. A special value of the seminar is the close view it gives of Jung's method of dream analysis through amplification. The editorial aim has been to preserve the integrity of Jung's text.

Children and Biography Kate Douglas 2022-08-25 The first study of life narratives produced for, about, and written by children, this book examines the recent popularity of children's biographies and how they engage with the

biggest issues of our time: environmental change, health crises, education, and children's personal and political development. Beginning with a literary-historical overview, *Children and Biography* proceeds to examine 21st-century examples and trends such as illustrated texts including *Women in Science*, the *Fantastically Great Women Who...* books, *Rebel Dogs*, *Goodnight Stories for Rebel Girls*, *Kids Who Did*, *My Beautiful Birds* and *The Journey*. The book also considers archives of children's writings and drawings, in particular the testimonies of child asylum seekers, children's biographical art, and 'Lockdown diaries' produced during the Covid-19 pandemic. By analyzing these works alongside empirical studies into how such material is received by child readers, and how texts generated by children are perceived both by them and their parents, this book provides new knowledge on how biographies for children are produced and read. Comprehensive and original, *Children and Biography*, presents an ethical methodological framework for scholarly practice when reading, witnessing and interpreting children's life narratives. The book offers a mandate for future researchers: to place children's voices and writing at the centre of inquiries in ways that facilitate genuine agency for child

authors.

Unicorn Stories for Kids Elisabeth Potter 2020-08-05 Want your child to use the imagination more with unicorns?Fantasy serves an essential and vital purpose to us. Anyone who enjoys reading knows that reading can take us anywhere the author's and our imaginations choose to guide us. Reading transports us to another time or place. By reading, we not only learn about things that we have never seen but also learn about things that never were in this world. Fantasy enables us to live in the land of never was. And that, in turn, allows us to create our own stories and worlds. Imagine how dull life

would be with no fantasy. Fantasy fuels our dreams and imaginations. That fuel is called inspiration. Inspiration is the basis of creativity. Creativity is what invention comes from. All that starts with fantasy and a vivid inner world. The best way to nurture that inner world in children begins with the bedtime story. When we remember our childhood, most people have early memories of their parents reading to them before bed. Those bedtime stories filled our dreams and fueled our imaginations as we grew. Thanks to those stories, we imagined ourselves flying in the sky with birds. We grew and became fairies with butterfly wings. We played dragons and unicorns. We went back in time, interacting with pirates, knights and dinosaurs. Our fantasy world cheered us when we were sad, and made us smile. This book covers: What is Meditation for Children With Techniques Self Esteem, Compassion, Empathy Techniques to Calming and Relaxing 20 Unicorn Bedtime Stories And Much More... Storytime before bed is a bonding time with your mom or dad or both. Kids are soothed to sleep with the sound of their mother or father 's voice. The story of bedtime is the inspiration for the dreams that your child might have at night. It's also a food for the child's conscious mind as they go about their day. Children are also strongly influenced when it comes to personality traits. Our

children learn through stories many of the values and character traits they will hold on to and hopefully demonstrate later in life as they grow up. Children are learning who they want to emulate, who they want to be and how to treat other people. There's one extra benefit with fantasy stories, their mind and imagination work out, as well as giving the gift of what could be. It is remarkable how things that never were and never will be can serve us in life. Our fantasy worlds give us gifts like the concept of inclusion of all species, and people, even those from outer space. Fantasy gives human voices and words to animals and machines, even robots. Fantasy helps us learn to empathize with people and creatures wholly different from ourselves. It teaches us to think before we react to something unfamiliar as well as how our words might make those who are not like us feel. We hope that this collection of stories will inspire your child similarly with characteristics such as friendship, courage, equality, hope, generosity, patience, inclusion, conservation, and love for all. Dream the sweetest dreams, little ones! Explore more unicorns by buying this book now!

Handbook of Research on Children's and Young Adult Literature Shelby Wolf
2011-04-27 This landmark volume is the first to bring together leading

scholarship on children's and young adult literature from three intersecting disciplines: Education, English, and Library and Information Science. Distinguished by its multidisciplinary approach, it describes and analyzes the different aspects of literary reading, texts, and contexts to illuminate how the book is transformed within and across different academic figurations of reading and interpreting children's literature. Part one considers perspectives on readers and reading literature in home, school, library, and community settings. Part two introduces analytic frames for studying young adult novels, picturebooks, indigenous literature, graphic novels, and other genres. Chapters include commentary on literary experiences and creative production from renowned authors and illustrators. Part three focuses on the social contexts of literary study, with chapters on censorship, awards, marketing, and literary museums. The singular contribution of this Handbook is to lay the groundwork for colleagues across disciplines to redraw the map of their separately figured worlds, thus to enlarge the scope of scholarship and dialogue as well as push ahead into uncharted territory.

Consuming Agency in Fairy Tales, Childlore, and Folkliterature Susan Honeyman 2013-04-15 In this book Honeyman looks at manifestations of

youth agency (and representations of agency produced for youth) as depicted in fairy tales, childlore and folk literature, investigating the dynamic of ideological manipulation and independent resistance as it can be read or expressed in bodies, first through social puppetry and then through coercive temptation (our consumption replacing the more obvious strings that bind us). Reading tales like Popeye, Hansel & Gretel, and Pinocchio, Honeyman concentrates on the agency of young subjects through material relations, especially where food signifies the invisible strings used to control them in popular discourse and practice, modeling efforts to come out from under the hegemonic handler and take control, at least of their own body spaces, and ultimately finding that most examples indicate less power than the ideal holds.

Children's Dreams in Clinical Practice S Catalano 2013-06-29 Once upon a time I dreamed myself a butterfly, floating like petals in the air, happy to be doing as I pleased, no longer aware of myself! But soon enough I awoke and then, frantically clutching myself, Chuang Tzu I was! I wonder: Was Chuang Tzu dreaming himself the butterfly, or was the butterfly dreaming itself Chuang Tzu? -Chuang Tzu Dreams are an endless source of mystery and fascination. Those we remember bring to our conscious awareness a variety of characters, circumstances, and situations often implausible or even bizarre in our everyday world. Sometimes dreams are more mundane and common place, reflecting memories of recent events of obvious importance. It is perhaps

because of our lack of ability to understand fully the origin of dreams or interpret their exact VII viii Preface meaning that dreams are the subject of such interest and speculation. Or perhaps, as the Chinese philosopher Chuang Tzu suggested, they allow us the freedom to expand our thoughts, associations, or spirit in a way that no other experience, waking or otherwise, can. Clinical interest in dream content has primarily been limited to the psychoanalytical perspective. This modern clinical interest in dreams is the direct result of Freud's landmark contribution concerning the importance of dreams in unconscious thought and in the practice of psychoanalysis. Theoretically, psychoanalytical interpretation of dream content as a repressive-defensive content function dominated clinical practice and application for many years and remains an influential school of thought.

Peter Pan's Shadows in the Literary Imagination Kirsten Stirling 2011-12-21

This book is a literary analysis of J.M. Barrie's Peter Pan in all its different versions -- key rewritings, dramatisations, prequels, and sequels -- and includes a synthesis of the main critical interpretations of the text over its history. A comprehensive and intelligent study of the Peter Pan phenomenon, this study discusses the book's complicated textual history, exploring its

origins in the Harlequinade theatrical tradition and British pantomime in the nineteenth century. Stirling investigates potential textual and extra-textual sources for Peter Pan, the critical tendency to seek sources in Barrie's own biography, and the proliferation of prequels and sequels aiming to explain, contextualize, or close off, Barrie's exploration of the imagination. The sources considered include Dave Barry and Ridley Pearson's *Starcatchers* trilogy, Régis Loisel's six-part Peter Pan graphic novel in French (1990-2004), Andrew Birkin's *The Lost Boys* series, the films *Hook* (1991), *Peter Pan* (2003) and *Finding Neverland* (2004), and Geraldine McCaughrean's "official sequel" *Peter Pan in Scarlet* (2006), among others.

Media and the Make-Believe Worlds of Children Maya Gotz 2014-04-04
Media and the Make-Believe Worlds of Children offers new insights into children's descriptions of their invented or "make-believe" worlds, and the role that the children's experience with media plays in creating these worlds. Based on the results of a cross-cultural study conducted in the United States, Germany, Israel, and South Korea, it offers an innovative look at media's role on children's creative lives. This distinctive volume: *outlines the central debates

and research findings in the area of children, fantasy worlds, and the media; *provides a descriptive account of children's make-believe worlds and their wishes for actions they would like to take in these worlds; *highlights the centrality of media in children's make believe worlds; *emphasizes the multiple creative ways in which children use media as resources in their environment to express their own inner worlds; and *suggests the various ways in which the tension between traditional gender portrayals that continue to dominate media texts and children's wishes to act are presented in their fantasies. The work also demonstrates the value of research in unveiling the complicated ways in which media are woven into the fabric of children's everyday lives, examining the creative and sophisticated uses they make of their contents, and highlighting the responsibility that producers of media texts for children have in offering young viewers a wide array of role models and narratives to use in their fantasies. An enclosed CD provides full-color images of the artwork produced during the study. This book will appeal to scholars and graduate students in children and media, early childhood education, and developmental psychology. It can be used in graduate level courses in these areas.

What Do Children Dream? Gérard Bleandonu 2006 When does the fetus start to dream? What are its early dreams? What is the function of infant dreams? What is the impact of nightmares? How do dreams evolve during adolescence? Is the visual aspect dominant in dreams? How do children who are born blind dream? Gerard Bleandonu brings to these questions his experience as a psychotherapist specializing in children suffering from psychological difficulties. Using the case studies of several children he has followed, he explains the content and structuring function of dreams. The children's own drawings often serve to elaborate on their dreams and render them more explicit. The author makes use of recent findings in neurophysiology which have improved our understanding of dream mechanisms. Today it is no longer possible to adhere to the Freudian thesis which states

that dreams serve either to fulfill wishes or to safeguard sleep.

Historical Dictionary of Scandinavian Literature and Theater Jan Sjøvik 2006-04-19 The literature of Scandinavia is amazingly rich and varied, consisting of the works produced by the countries of Denmark, Norway, Sweden, Finland and Iceland, and stretching from the ancient Norse Sagas to the present day. While much of it is unknown outside of the region, some has gained worldwide popularity, including the fairy tales of Hans Christian Andersen, the stories of Isak Dinesen, and the plays of Henrik Ibsen and August Strindberg. While obviously including the area's most famous works, the Historical Dictionary of Scandinavian Literature and Theater also provides information on lesser known authors and current trends, literary circles and journals, and historical background. This is accomplished through a list of acronyms, a chronology, an introductory essay, a bibliography, and several hundred cross-referenced dictionary entries, which together make this reference the most comprehensive and up to date work of its kind related to Scandinavian literature and theater available anywhere.

British Working-Class Writing for Children Haru Takiuchi 2017-08-21 This book explores how working-class writers in the 1960s and 1970s significantly reshaped British children's literature through their representations of working-class life and culture. Aidan Chambers, Alan Garner and Robert Westall were examples of what Richard Hoggart termed 'scholarship boys': working-class individuals who were educated out of their class through grammar school education. This book highlights the role these writers played in changing the publishing and reviewing practices of the British children's literature industry while offering new readings of their novels featuring scholarship boys. As well as drawing on the work of Raymond Williams and Pierre Bourdieu, and referring to studies of scholarship boys in the fields of social science and education, this book also explores personal interviews and previously-unseen archival materials. Yielding significant insights on British children's literature of the period, this book will be of particular interest to scholars and students in the fields of children's and working-class literature and of British popular

culture.

Critical Multicultural Analysis of Children's Literature Maria José Botelho 2009-05-07 "Children's literature is a contested terrain, as is multicultural education. Taken together, they pose a formidable challenge to both classroom teachers and academics.... Rather than deny the inherent conflicts and tensions in the field, in *Critical Multicultural Analysis of Children's Literature: Mirrors, Windows, and Doors*, Maria José Botelho and Masha Kabakow Rudman confront, deconstruct, and reconstruct these terrains by proposing a reframing of the field.... Surely all of us – children, teachers, and academics – can benefit from this more expansive understanding of what it means to read books." Sonia Nieto, From the Foreword Critical multicultural analysis provides a philosophical shift for teaching literature, constructing curriculum, and taking up issues of diversity and social justice. It problematizes children's literature, offers a way of reading power, explores the complex web of sociopolitical relations, and deconstructs taken-for-granted assumptions about language, meaning, reading, and literature: it is literary study as sociopolitical change. Bringing a critical lens to the study of multiculturalism in children's literature, this book prepares teachers, teacher educators, and researchers of children's

literature to analyze the ideological dimensions of reading and studying literature. Each chapter includes recommendations for classroom application, classroom research, and further reading. Helpful end-of-book appendixes include a list of children's book awards, lists of publishers, diagrams of the power continuum and the theoretical framework of critical multicultural analysis, and lists of selected children's literature journals and online resources.

The Future of the Nineteenth-Century Dream-Child Amy Billone 2016-06-10
This book investigates the reappearance of the 19th-century dream-child from the Golden Age of Children's Literature, both in the Harry Potter series and in other works that have reached unprecedented levels of popular success today. Discussing Harry Potter as a reincarnation of Lewis Carroll's Alice and J.M. Barrie's Peter Pan, Billone goes on to examine the recent resurrection of Alice in Tim Burton's Alice, and of Peter Pan in Michael Jackson and in James Bond. Visiting trends that have emerged since the Harry Potter series ended, the book studies revisions of the dream-child in texts and films that have inspired mass fandom in the twenty-first century: Stephenie Meyer's Twilight, E.L. James's 50 Shades of Grey and Suzanne Collins's The Hunger Games. The volume argues that the 21st-century desire to achieve dream-states in

relationship to eternal youth results from the way that dreams provide a means of realizing the fantastic yet alarming possibility of escaping from time. This current identification with the dream-child stems from the threat of political unrest and economic and environmental collapse as well as from the simultaneous technophilia and technophobia of a culture immersed in the breathless revolution of the digital age. This book not only explores how the dream-child from the past has returned to reflect misgivings about imagined dystopian futures but also reveals how the rebirth of the dream-child opens up possibilities for new narratives where happy endings remain viable against all odds. It will appeal to scholars in a wide variety of fields including Childhood Studies, Children's/YA Literature, Cinema Studies, Cultural Studies, Cyberculture, Gender Studies, Queer Studies, Gothic Studies, New Media, and Popular Culture.
