National College Entrance Exam in China Yu Zhang 2016-01-29

This book focuses on the National College Entrance Exam (NCEE), an important measurement of education quality in China, from both education economics and education policy perspectives. It provides a better understanding and stimulates more sophisticated evaluations of NCEE-related policies in China from the perspectives of education equity, the effectiveness of education input, and education quality. This book reports inspiring findings based on high-quality individual level data, innovative measurement design, and various appropriate

identification strategies. The most important conclusion is that both education equity and quality can be achieved using well-designed policies based on solid empirical evidence. This is likely the first book published in English to discuss the NCEE so extensively from multiple perspectives using concrete evidence. Research in Education 1974

Psychological Assessment in South Africa Sumaya Laher 2013-

01-01 This book provides an overview of the research related to psychological assessment across South Africa. The thirty-six chapters provide a combination of psychometric theory and practical assessment applications in order to combine the currently disparate research that has been conducted locally in this field. Existing South African texts on psychological assessment are predominantly academic textbooks that explain psychometric theory and provide brief descriptions of a few testing instruments. Psychological Assessment in South Africa provides in-depth coverage of a range of areas within the broad field of psychological assessment, including research conducted with various psychological instruments. The chapters critically interrogate the current Eurocentric and Western cultural hegemonic practices that dominate the field of psychological assessment. The book therefore has the potential to function both as an academic text for graduate students, as well as a specialist resource for professionals, including psychologists, psychometrists, remedial teachers and human resource practitioners.

Out-of-field Teaching Across Teaching Disciplines and Contexts

Linda Hobbs 2022 This edited book is a compilation of research by the members of the Out-of-Field Teaching Across Specialisations (OOF-TAS) Collective, and is the second book by the Collective. It extends from the work begun in the 2019 book, Examining the Phenomenon of "Teaching Out-of-Field" by showcasing the broad range of research agendas and findings relating to this phenomenon internationally. This book provides research and commentary relating to the out-of-field teaching phenomenon in primary, secondary and tertiary education, and across different subjects. It provides snapshots of the effects, causes, measurement, and other characteristics of out-of-field teaching in and across contexts, including states and countries, school types and school levels, subjects and specializations. The different chapters provide commentary at different units of analysis, and focus on: the effects of out-of-field teaching for teachers and their students; the school contexts/cultures that do or do not support them; the leadership practices that assign the teachers to out-of-field subjects; and the systems that create/perpetuate the need for out-of-field teaching assignments. Honouring High Places Junko Tabei 2017-11-07 A collection of personal stories and reflections based on the memoirs of Junko Tabei, the first woman to climb Mount Everest and the Seven Summits. Honouring High Places is a compelling collection of highlights from Junko Tabei's stirring life that she considered important, inspiring and interesting to mountaineering culture. Until now, her works have been available only in Japanese, and RMB is honoured to be sharing these profound and moving stories with the English-speaking world for the first time. The collection opens on Mount Everest, where the first all-women's expedition is met with disaster but pushes on against all odds. The story then shifts to the early years of Tabei's life and reflects on her countryside childhood as a frail girl with no talent for sport, and cultural expectations that ignored her passion for mountains. With reminiscences of the early days of female climbers on Everest, the deaths of fellow mountaineers, Tabei's pursuit of Mount Tomur, a cancer diagnosis, and efforts to restore a love for nature in the surviving youth of the Fukushima earthquake and tsunami that hit Japan in 2011, this beautifully curated collection of essays captures the essence of a notable time and the strength of character of one of the 20th and 21st centuries' female mountaineering pioneers.
