Security and Conflict Transformation: An Internal Business Roberto Santamarta-Perez 2014 Peace and humanitarian operations are affected by internal conflicts, possibly in a higher level than other type of organizations, due to its natural hazardous settings and the expected stress situations that its members sign for when joining. Occasionally, these conflicts escalate to unsuspecting grades and, eventually, disrupt the operations to unwanted degrees. To transform intra-organizational conflicts, this book proposes a methodological set of recommendations at every level to be implemented by security departments in peace and humanitarian operations. Its optimal execution would not only avoid the “misuse of security” by senior officials but fully integrate them into operations' mandates, achieve better intra-organizational conflict transformation expertise, and moreover, reach ultimate operational goals in peacebuilding and humanitarian aid. Additionally, the methodology proposed could be conveniently extrapolated to different public and private sector organizational spheres, where internal conflict plays a substantive role.

Emerging Challenges, Solutions, and Best Practices for Digital Enterprise Transformation Sandhu, Kamaljeet 2021-06-18 As organizations continue to move towards digital enterprise, the need for digital transformation continues to grow especially due to the COVID-19 pandemic. These impacts will last far into the future, as newer digital technologies continue to be accepted, used, and developed. These digital tools will forever change the face of business and management. However, on the road to digital enterprise transformation there are many successes, difficulties, challenges, and failures. Finding solutions for these issues through strategic thinking and identification of the core issues facing the enterprise is of primary concern. This means modernizing management and strategies around the digital workforce and understanding digital business at various levels. These key areas of digitalization and global challenges, such as those during or derived from the pandemic, are new and unique; They require new knowledge gained from a deep understanding of complex issues that have been examined and the solutions being discovered.

Emerging Challenges, Solutions, and Best Practices for Digital Enterprise Transformation explores the key challenges being faced as businesses undergo digital transformation. It provides both solutions and best practices for not only handling and solving these key issues, but for becoming successful in digital enterprise. This includes topics such as security and privacy in technologies, data management, information and communication technologies, and digital marketing, branding, and commerce. This book is ideal for managers, business professionals, government, researchers, students, practitioners, stakeholders, academicians, and anyone else

looking to learn about new developments in digital enterprise transformation of business systems from a global perspective.

Six Sigma in HR Transformation Mircea Albeanu 2017-05-15 In the business world, especially in manufacturing or quality management, the term Six Sigma usually refers to a set of tools and methodologies developed by Motorola to improve processes by eliminating defects. So why should the HR professional care what Six Sigma is or how it can be applied in the HR function? According to the specialists at Orion Partners, there are ten key reasons: * to create excellence in process delivery; * to reduce defects; * to increase efficiency; * to create a quality focused mindset; * to benefit from best practice; * to bring clarity to the processes of HR; * to use a structured scientific approach; * to speak the same language and improve communication; * to gain control over your processes; * and to strengthen your business case. Mircea Albeanu and Ian Hunter explain some of the basic concepts to show how applying Six Sigma tools and methodologies can be used to manage the practical challenges of improving HR operations to meet your organization's expectations at a lower cost and with greater efficiency. To help illustrate some of the key messages examples are drawn from Orion Partners' work using Six Sigma tools with international organizations over the last seven years. This concise guide is ideal for project and programme managers involved in business transformation, and for HR managers as well as Six Sigma specialists seeking to understand its applications within human resources. About The Gower HR Transformation Series: The Human Resources function faces a continuing challenge to its role and purpose, in many organizations it has suffered from serious under-representation at strategic, board level. Yet, faced with the challenges of globalism, the need to innovate, manage knowledge, attract and retain the very best employees, organizations need an HR function that can lead from the front. The process of transforming the function is complex and rarely linear. It includes the practical challenges of improving HR operations to meet customer expectations at lower cost and with greater efficiency. The Gower HR Transformation Series will help; it uses a blend of conceptual frameworks, practical advice and global case study examples to cover each of the main elements of the HR transformation process. The books in the series follow a standard format to make them easy to read and reference. Together, the titles create a definitive guide from one of the leading specialist HR transformation consultancies; an organization that has been involved in HR transformation for clients as diverse as Bombardier Transportation, Marks & Spencer, Barnardo's, Oxfam, Schrodgers, UnitedHealth Group, Nestlé, BP, HM Prison Service, Transport for London and Vodafone.

Proceedings on 25th International Joint Conference on Industrial Engineering and Operations Management – IJCIEOM Zoran Anisic 2020-03-20 This book presents the conference proceedings of the 25th edition of the International Joint Conference on Industrial Engineering and Operations Management. The conference is organized by 6 institutions (from different countries and continents) that gather a large number of members in the field of operational management, industrial

engineering and engineering management. This edition of the conference had the title: THE NEXT GENERATION OF PRODUCTION AND SERVICE SYSTEMS in order to emphasis unpredictable and very changeable future. This conference is aimed to enhance connection between academia and industry and to gather researchers and practitioners specializing in operation management, industrial engineering, engineering management and other related disciplines from around the world.

Intelligent and Fuzzy Techniques for Emerging Conditions and Digital Transformation Cengiz Kahraman 2021-08-23 This book presents recent research in intelligent and fuzzy techniques. Emerging conditions such as pandemic, wars, natural disasters and various high technologies force people for significant changes in business and social life. The adoption of digital technologies to transform services or businesses, through replacing non-digital or manual processes with digital processes or replacing older digital technology with newer digital technologies through intelligent systems is the main scope of this book. It focuses on revealing the reflection of digital transformation in our business and social life under emerging conditions through intelligent and fuzzy systems. The latest intelligent and fuzzy methods and techniques on digital transformation are introduced by theory and applications. The intended readers are intelligent and fuzzy systems researchers, lecturers, M.Sc. and Ph.D. students studying digital transformation. Usage of ordinary fuzzy sets and their extensions, heuristics and metaheuristics from optimization to machine learning, from quality management to risk management makes the book an excellent source for researchers.

A Comparative Study on the Role of Universities in Transformation of Knowledge and Skills in Rural Areas Li Wang 2015-03-25 This book is an important investigation of the roles that a university plays in sustainable rural development. In doing so, the book takes an interesting approach and engages in a comparative study of two universities, located in China and Australia. The book examines that in spite of being in different locations their work and roles are no less significant in terms of national development. The book poses the question, 'What is the role of universities in bringing about knowledge transformation in rural communities?'

Transforming Field and Service Operations Gilbert Owusu 2014-02-03 The drive to realise operational efficiencies, improve customer service, develop new markets and accelerate the introduction of new products has substantially increased the complexity of field service operations. To maximise the efficiency and effectiveness of these operations, organisations have embarked on a wide range of transformation programmes that have sought to introduce automation through the use of workforce management technologies. Despite the potential business value that can be provided by such transformation programmes, too often, the automation technologies have not been fully utilised and their expected benefits have as such not been realised. Scholars of organisation change argue that the success of any transformation programme is a function of how well the technical, political, structural and social aspects of a specific project have been managed. The objective of this edited book is to provide insights into how organisations might successfully transform their field service operations with the help of workforce management technologies. Accordingly, the book is organised into four sections: Section A "The Case for Transforming Service and Field Operations" explains the rationale as to why organisations should actively consider transforming their service and field operations, while Section B presents various "Methods, Models and Enabling Technologies for Transforming Service and Field Operations". In Section C, a number of "Case Studies" illustrate how new technologies can be applied to field and service operations to deliver concrete business benefits. Lastly, Section D considers "Challenges, Outcomes and Future Directions". Overall, this book provides valuable insights into how to successfully transform field service operations with automated technologies. It draws on years of experience from different industries and from different perspectives on realising change. It is aimed at managers, technologists, change agents and scholars who are interested in field service operations in general and the use of advanced computing technologies in this area in particular.

The Transformation of Academic Health Centers Steven Wartman 2015-03-30 The Transformation of Academic Health Centers: The Institutional Challenge to Improve Health and Well-Being in Healthcare's Changing Landscape presents the direct knowledge and vision of accomplished academic leaders whose unique positions as managers of some of the most complex academic and business enterprises make them expert contributors. Users will find invaluable insights and leadership perspectives on healthcare, health professions education, and bio-medical and clinical research that systematically explores the evolving role of global academic health centers with an eye focused on the transformation necessary to be successful in challenging environments. The book is divided into five sections moving from the broad perspective of the role of academic health centers to the role of education, training, and disruptive technologies. It then addresses the discovery processes, improving funding models, and research efficiency. Subsequent sections address the coming changes in healthcare delivery and future perspectives, providing a complete picture of the needs of the growing and influential healthcare sector. Outlines strategies for academic health centers to successfully adapt to the global changes in healthcare and delivery Offers forward-thinking and compelling professional and personal assessments of the evolving role of academic health centers by recognized outstanding academic healthcare leaders Includes case studies and personal reflections, providing lessons learned and new recommendations to challenge leaders Provides discussions on the discovery process, improving funding models, and research efficiency

Capability Management in Digital Enterprises Kurt Sandkuhl 2018-07-28 Putting capability management into practice requires both a solid theoretical foundation and realistic approaches. This book introduces a development methodology that integrates business and information system development and run-time adjustment based on the concept of capability by presenting the main findings of the CaaS project – the Capability-Driven Development (CDD) methodology, the architecture and components of the CDD environment, examples of real-world applications of CDD, and aspects of CDD usage for creating business value and new opportunities. Capability thinking characterizes an organizational mindset, putting capabilities at the center of the business model and information systems development. It is expected to help organizations and in particular digital enterprises to increase flexibility and agility in adapting to changes in their economic and regulatory environments. Capability management denotes the principles of how capability thinking should be implemented in an organization and the organizational means. This book is intended for anyone who wants to explore the opportunities for developing and managing context-dependent business capabilities and the supporting business services. It does not require a detailed understanding of specific development methods and tools, although some background knowledge and experience in information system development is advisable. The individual chapters have been written by leading researchers in the field of information systems development, enterprise modeling and capability management, as well as practitioners and industrial experts from these fields.

Global Business and Management Research: An International Journal Vol.2 No.1 Mehran Nejati 2010-06-10 The Journal of Global Business and Management Research (GBMR) is a quarterly peer-reviewed journal which strives to comply with highest research standards and scientific/research/practice journals' qualities. Being international and inter-disciplinary in scope, GBMR seeks to provide a platform for debate among diverse academic and practitioner communities who address a broad area of business and management issues across the globe. It is currently indexed in a number of prestigious databases including Gale and Ebsco.

Analytical Methods for Studies and Experiments on "Transforming the Force" Paul K. Davis 1999 This documented briefing describes interim progress on a project concerned with "transforming U.S. forces" to reflect what is often called the revolution in military affairs. After background review describing a broad transformation strategy, we discuss and illustrate how analysis supported by models and simulations (including gaming) can supplement and guide empirical work such as joint

experiments on new operational concepts.

Researching Operations Management Christer Karlsson 2010-03-17 Researching Operations Management fills the growing need for a comprehensive textbook and reference on doing quality research in the field of Operations Management (OM). It addresses the particular problem—especially for advanced students and beginning researchers—that many academic departments specialize in just one or a few approaches to research. As a result many students and researchers are not exposed to the breadth of possible research approaches in OM. Providing a concise overview of each of the most important research approaches in the field, the book enables researchers and students to understand and practice these methods, thus giving them a platform for choosing appropriate and complementary approaches to their research. With contributions from an international group of leading thinkers in the OM research field, the book covers those methods frequently used in studies of OM as well as adjacent applied management areas such as management of innovation and R&D, logistics, and supply chain management. Included are chapters on surveys, case studies, action research, longitudinal field studies, and models and simulations together with chapters on planning, positioning, assessing, and publishing research. In addition, the contributors also consider ethical and cultural issues in researching operations management.

Building a Digital Future Lipi Sarkar 2021-04-21 The dramatic events of 2020 have clarified the urgent need for digital transformation in countless organizations. The rise of remote work and the rapidly increasing use of cloud technologies are just two drivers of the relentless pace of digital disruption. Despite this, many companies remain underequipped or hesitant to embrace digital transformation. Understanding the key drivers of change and leveraging the powerful capabilities from technologies with a collaborative platform can aid an organization to prepare for digital transformation. Building a Digital Future provides a clearly defined roadmap for executing this change with Microsoft Dynamics 365. Firms of all types and sizes will learn how Microsoft Dynamics 365 can help them: achieve competitive advantages for their business reduce the time needed to effect change by automating time-consuming tasks drive innovation and improvements through an evergreen system post implementation Each chapter of this book is curated with best practices, compelling customer examples, pitfalls to avoid, and salient points to remember. Building a Digital Future enables organizations to truly embrace the benefits of digital transformation by anchoring Microsoft Dynamics 365 at the core of their business. Perfect for any business leader looking for a one-stop and comprehensive playbook for transforming their business into a digital powerhouse with Dynamics 365.

Leading the e-Learning Transformation of Higher Education Gary Miller 2013-12-16 Written by pioneers in the field of online learning, Leading the e-Learning Transformation of Higher Education is a professional text that offers insights and guidance to the rising generation of leaders in the field of higher education. It explains how to integrate online learning into an institution during a period of rapid social and institutional change. This important volume: ? Shares success stories, interviews, cases and insights from a broad range of leadership styles ? Reviews how technology is transforming higher education worldwide ? Provides an overview of how distance education is organized in a range of institutional settings ? Breaks down current leadership challenges in both unit operations and institutional policy This volume launches the new Stylus series that is aimed at the online learning and distance education market. It offers readers the opportunity to benefit from the collective experience and expertise of top leaders in the field. All of the contributors have held leadership roles in national and international distance education organizations. Five of the contributors have been recognized as Sloan Consortium Fellows in 2010 and they have all collaborated with the Institute for Emerging Leaders in Online Learning. These contributors have helped pave the way and now share their insights, advice, and broad vision with the future leaders of the field.

Global Competitiveness: Business Transformation in the Digital Era Ade Gafar Abdullah 2019-07-09 The proceedings of the "Economics and Business Competitiveness International Conference" (EBCICON) provides a selection of papers, either research results or literature reviews, on business transformation in the digital era. Nine major subject areas, comprising accounting and governance, customer relations, entrepreneurship, environmental issues, finance and investment, human capital, industrial revolution 4.0, international issues, and operations and supply chain management are presented in the proceedings. Islamic Values and Management Practices Maqbouleh M Hammoudeh 2012-08-28 The author of this thought provoking addition to Gower's Transformation and

Innovation Series has worked as a management consultant in the Arab Middle East for 25 years. In *Islamic Values and Management Practices* she acknowledges that businesses and other organizations in the region face urgent concerns in relation to quality and transformation, but argues that these issues might be more appropriately addressed by the application of an Islamic Management Model, rather than the 'Western' one hitherto applied. Over time, a set of management systems based on Islamic values has been developed by the author. These systems recognise the need to build human organizations, socially and politically as well as commercially, and also the recognition that for Muslims, justice is the ultimate value, bringing balance between the individual's soul and spirit on the one hand, and the organization's soul and spirit on the other. This Islamic management model stresses that effectiveness is an outcome of operating efficiently and at the same time unifying the organization's objectives with those of its employees and wider society, and ensuring that at the strategic level the long view is always maintained. Recounting her own personal and business journey, Maqbouleh Hammoudeh presents the outcomes of research that has tested the application of the Islamic Management Model and its ability to deliver the desired quality and transformation outcomes in a major civic or profit making organization. At a time when many practitioners and business educators are seeking new management approaches, this revealing case study sheds light on the evolution of a contemporary theory of management for the Muslim World.

Advances in Enterprise Engineering XIV David Aveiro 2021-04-13 This book constitutes the proceedings of the 10th Enterprise Engineering Working Conference, EEWC 2020, which was planned to take place in Bozen-Bolzano, Italy, and had to change to an online event due to the COVID 19 pandemic. The online event took place on September 28, 2020, October 19, 2020, and November 9–10, 2020. EEWC aims at addressing the challenges that modern and complex enterprises are facing in a rapidly changing world. The participants of the working conference share a belief that dealing with these challenges requires rigorous and scientific solutions, focusing on the design and engineering of enterprises. The goal of EEWC is to stimulate interaction between the different stakeholders, scientists as well as practitioners, interested in making Enterprise Engineering a reality. The 8 full papers and 2 short papers presented in this volume were carefully reviewed and selected from 23 submissions. The volume also contains 3 keynote papers in full paper length. The papers were organized in topical sections as follows: formal approaches and modeling; the DEMO modeling language; and enterprise engineering practice.

New Techniques and Technologies in Thin Coal Seam Exploitation Artur Dyczko 2011-12-16 Provides an up-to-date overview of the Polish and international experience in the area of thin coal seam mining with an emphasis on implementation of the plow technology in mining. The implementation of the plow technology in Poland is performed by young engineers for whom the automated extraction system presents itself as a great challenge showing the direction of future developments: a production mining face manned by a skeleton crew, fully utilizing the potential offered by the information technology. They create new ways and means of running the production processes, which are successfully used together with the new generation plows. Successive generations of young mining engineers entering their careers are equipped with a new type of ability and, most of all, awareness which is characterized by a new understanding of reality, in which "real" is what is on the screen. They are the guarantee that this direction of research and the drive towards minimizing human involvement in the underground production chores will receive increasing focus and will remain the area of development. The experiences to-date of three mines (KWK Zofiówka, KWK Jas-Mos, and LW Bogdanka SA) show that there is a real potential for the Polish companies to join in the research aimed at developing new plow installations.
